EMS Energy says unit Oilfield Services & Supplies (OSS) has secured a US\$2.16 million (\$3 million) contract with oil operator Talisman Australasia Pty Ltd for the refurbishment of its LYR-605 Coral Sea heli-portable land-drilling rig in Singapore.

The rig will be disassembled, thoroughly cleaned, inspected, repaired as necessary, assembled, tested and re-certified before being redelivered to Talisman.

The project is scheduled for a period of three months from Dec 29, 2009 with the rig expected to be re-delivered to Talisman by the end of March 2010.
